AD00 Anti-Graffiti

ANTI-GRAFFITI & PROTECTION
EXTREME PERFORMANCE TREATMENT

MicroGuard® AD00 Anti-Graffiti Clear Surface Treatment provides a permanent (non-sacrificial) protective barrier for many bare and painted surfaces where graffiti tagging is a problem. The non-stick, repelling properties of this clear treatment prevent graffiti from attaching to the surface making removal quick and simple. All forms of aerosol and roller-applied paint, permanent marker, ink, etc. can be removed using solvent or one of many commercial cleaners without damaging the protective clear coat.

MicroGuard® AD00 Anti-Graffiti Clear Surface Treatment is a reactive siloxane coating that forms an unbreakable bond (at the molecular level) with a variety of surfaces. The result is unmatched weatherability and durability making MicroGuard AD00 a top choice for municipal, commercial and industrial applications where difficult-to-reach areas such as concrete abutments, overpasses, sound barriers, underpass bridges, etc. must be protected.

PRIMARY BENEFITS INCLUDE:

- Permanent Protection from Graffiti Tagging
- One-Coat Application
- Outstanding Barrier Properties
- Withstands Multiple Washings (non-sacrificial)
- Unmatched Abrasion Resistance (ASTM D-4060)
- Outstanding UV Resistance, Non-yellowing
- Can be Applied Over Existing Coatings

APPLICATIONS INCLUDE:

- Bare and Coated Concrete
- Masonry
- Stone
- Metal
- Painted Surfaces

Please contact your MicroGuard representative for more information and a complete list of field applications and documented case studies.
